Natural Resources Financing 19 Jun 2026 Energy sovereignty under strain: from transition to strategic control For decades, the global energy agenda has been framed around transition: decarbonization pathways, renewable deployment... Expert views For decades, the global energy agenda has been framed around transition: decarbonization pathways, renewable deployment and climate targets. That paradigm is shifting. The central question is no longer only how fast we can decarbonize, but who controls the resources, technologies and value chains that enable it. Energy sovereignty under strain: from transition to strategic control 19 Jun 2026 Contributing to decarbonization at scale: connecting the building blocks of an integrated energy transition As the energy transition accelerates, solutions such as Carbon Capture, Utilization and Storage (CCUS), hydrogen and... Expert views As the energy transition accelerates, solutions such as Carbon Capture, Utilization and Storage (CCUS), hydrogen and e-fuels are moving from ambition to deployment across global markets. Technologies are maturing and industrial activity is increasing, but scaling these solutions now depends on something more complex: the ability to structure, finance and... Contributing to decarbonization at scale: connecting the building blocks of an integrated energy transition 17 Jun 2026 Banking on Nature: Financing Ecosystem Restoration Across the US As climate pressures intensify, environmental infrastructure and mitigation banking emerge as important enablers to... Clients' successes As climate pressures intensify, environmental infrastructure and mitigation banking emerge as important enablers to protect and preserve biodiversity. Societe Generale's participation in Naturion's financing highlights how mitigation banking can help channel capital toward nature-based solutions with measurable environmental impact. Banking on Nature: Financing Ecosystem Restoration Across the US
