

The Credit Market Lens: One AI Trade for Now, Many Trades Later

PIMCO · lotfi karoui · 2026-09-14 · English original

Statements concerning financial market trends or portfolio strategies are based on current market conditions, which will fluctuate. Outlook and strategies are subject to change without notice.

Past performance is not a guarantee or a reliable indicator of future results. Forecasts, estimates and certain information contained herein are based upon proprietary research and should not be considered as investment advice. There is no guarantee that stated results will be achieved.

Equity investments may decline in value due to both real and perceived general market, economic and industry conditions, while debt investments are subject to credit, interest rate and other risks.

Investments with exposure to the artificial intelligence sector may involve heightened risks, including rapid technological change, competitive disruption, elevated valuations, regulatory uncertainty, data privacy and cybersecurity concerns, infrastructure dependencies, and reliance on third-party models or platforms. AI-related opportunities may not develop as expected, fail to produce anticipated productivity or revenue benefits, or be concentrated among a limited number of issuers, and could result in increased volatility or loss of capital. Real asset investments including data centers are subject to a variety of inherent risks such as economic and market risk, rental rates, location and physical condition of the properties, financial condition of tenants, buyers and sellers, operating costs, interest rates, energy prices, environmental laws and other regulatory liability, natural catastrophes, civil unrest and illiquidity. Corporate debt securities are subject to the risk of the issuer's inability to meet principal and interest payments on the obligation and may also be subject to price volatility due to factors such as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity.

PIMCO as a general matter provides services to qualified institutions, financial intermediaries and institutional investors. Individual investors should contact their own financial professional to determine the most appropriate investment options for their financial situation.
