Middle East Turmoil: Unsettled and Unsettling

An energy-led supply shock has driven a relatively muted emerging-markets macro impact assessment. A new Citi Research report explores why the blow has been less than expected, at least so far, and looks at economies that could be more and less affected.

Navigating the Economic and Regulatory Landscape in 2026: Opportunities and Challenges in Asia Pacific

2026 looks to be the year where global financial services regulation begins to pivot.

Sizing the ETF Opportunity: Active ETFs Move to Center Stage

For analysts, nothing is more satisfying than raising long-term forecasts that had once seemed aggressive, if not unattainable. That's where we find ourselves today with U.S. Exchange-Traded Funds' assets under management. Citi Research explores U.S. ETFs' more mature growth phase in this new Must C report.
