In this election preview episode of WashingtonWise, host Mike Townsend offers his guide to the 2026 midterms, including the latest outlook for control of the House and Senate, the key races that could determine the balance of power, and why divided government is emerging as the most likely outcome. Mike goes in depth on the markets and midterms, including historical reaction to elections, where investors should consider putting their focus, and how major policy battles could shape 2027.

Mike also shares the latest from Washington, including the Senate's failure to move forward on data center legislation and a congressional stock trading ban, the dramatic expansion of Trump Accounts, and changes at the SEC.

Investing involves risk, including loss of principal.

Cryptocurrency-related products carry a substantial level of risk and are not suitable for all investors. Investments in cryptocurrencies are relatively new, highly speculative, and may be subject to extreme price volatility, illiquidity, and increased risk of loss, including your entire investment in the fund. Spot markets on which cryptocurrencies trade are relatively new and largely unregulated, and therefore, may be more exposed to fraud and security breaches than established, regulated exchanges for other financial assets or instruments. Some cryptocurrency-related products use futures contracts to attempt

to duplicate the performance of an investment in cryptocurrency, which may result in unpredictable pricing, higher transaction costs, and performance that fails to track the price of the reference cryptocurrency as intended
