

E86: AI's Race for Real-World Data

Citi · 2026-08-27 · English original

KEY TAKEAWAYS

Physical AI will see artificial intelligence move beyond the digital realm into factories, warehouses, transportation networks and everyday life, with profound impacts on companies, supply chains and the broader economy. Ahead of Citi's Global TMT Conference in New York, Elise Badoy and Martin Wilkie explore this fascinating frontier and its implications.
